Partner program Texas Tech

The **Texas Tech University** in Lubbock, Texas, USA has been a partner university of the **Jade University of Applied Sciences** since 1987. The collaboration between the two universities is organized by the **Edward E. Whitacre Jr. College of Engineering** in Lubbock and the two departments **Engineering Sciences** and **Management, Information, Technology** in Wilhelmshaven.

Citation from the partnership agreement: "The purpose of the exchange program is to promote international friendship and world peace by stimulating and supporting intercultural activities and projects among students from Texas Tech and Jade Hochschule."

Summerprograms and summerprojects with German and American students have been held regularly since 2010. In addition to their intercultural competence, they acquire credits which can count towards their degree.

- yearly **summerprogram** July / August
- every two years **summerproject** April - September, next summerproject in 2020
