

## **Invitation to the 16th »HC-H2 Science Spotlight« on the 13th of November 2024**

The Institute for a Sustainable Hydrogen Economy (INW) and the Helmholtz Cluster for a Sustainable and Infrastructure-compatible Hydrogen Economy (HC-H2) warmly invite you to attend the 16<sup>th</sup> »HC-H2 Science Spotlight«, featuring a talk by **Prof. Ralf Brauner and Dieter Sichau**, at 16:00 on the **13<sup>th</sup> of November 2024**.

Prof. Brauner is currently Professor for Marine Meteorology, Sustainable Shipping and Computer Science at the Jade University of Applied Sciences. Mr. Sichau is currently managing director of the Innovation Centre for Sustainability and Production Technology GmbH. In their talk entitled “Hydrogen and Synthetic Products - Applications in the Maritime Economy“, Prof. Brauner and Mr. Sichau will provide insight into their current research and discuss the importance of his work for the future development of implementing hydrogen technologies in maritime applications.

You can register at the following link until the 12th of November 2024:

<https://app.smartsheet.com/b/form/7a9e4450e6b14e169212e49ec4e74e68>

As there is limited capacity for people to attend the event in person, we kindly ask that you let us know soon. You will receive an Outlook event invitation after registering. Online participation is guaranteed for all those who register for the event.

The Helmholtz Cluster’s HC-H2 Science Spotlight event is a regular series of scientific lectures focusing on topics in the fields of sustainable hydrogen production, storage, and application.

At each HC-H2 Science Spotlight event, an individual from the scientific community will present their area of research and speak about selected topics or projects. In the subsequent discussion with the audience, issues can be explored in greater depth and a light can be shed on the practical application of research results as well as their significance for the development of a sustainable hydrogen economy.
